24/7 flood condition monitoring

Alerts via phone, text, and email

Save time, money, and stress

Keep Your Building Protected from Water Damage

994/957 with SentryPlus Alert® Technology

BMS Sensor Retrofit Connection Kit Shown

Water damage from unattended RPZ valve discharge can cost thousands of dollars in repairs for your facility. What if you could be alerted of potential flooding before it happens?

Series 994/957 and related models now come with an integrated flood sensor. With the purchase of an activation kit, you'll be able to utilize reliable flood detection with real-time alerts when potential flood conditions are detected in your facility.

How it Works:

- 1 Install Your Backflow Preventer as Usual
- 2 Buy a Connection Kit to Activate Flood Sensor Technology
- 3 Enjoy Reliable Flood Detection

Having reliable flood detection is a must.
